Australian Speleological Federation	Graham Pilkington
S.A. Speleological Council	Graham Pilkington
Nullarbor Karst Project Steering Committee (WA)	Paul Hosie
Kanawinka Geopark Liaison	Ian Lewis

PRESIDENT'S REPORT

Although CEGSA has one of the largest memberships of any ASF club, many of our members have effectively retired from caving or are taking a long break. The number that join in club activities is actually quite small. Nevertheless, CEGSA has again been involved in a whole range of events during the year, some of which are outlined in the various reports herein.

Some of our caving activities are purely recreational and others have supported a range of community groups (schools, university groups, cave managers, archaeologists, cave scientists etc). But the excitement of finding, exploring and documenting hitherto undiscovered caves or cave passages is one of the things that keeps many cavers going year after year. CEGSA and many other Australian clubs have been in existence for well over half a century but the opportunity to keep making such discoveries continues, as evidenced by new finds in the Nullarbor cliffs and on the Nullarbor Plain, not to mention the vast amount of new cave that is discovered up in the Northern Territory each year and by our divers interstate and overseas. The rewards of such discoveries are still there for those who are prepared to put the work in.

My tenure as CEGSA President will come to an end at the 2014 AGM and another will take on that role thereafter. During the last few years, I have written and spoken several times about the need for cavers of all caving groups in South Australia to start working more closely together and to share in each other's activities. I am pleased to say that there has been a willingness among many cavers to do exactly that and I will be endeavouring to see such collaboration continue in the future. To do so provides a means for newer members in particular to enjoy a greater range of caving opportunities and experiences.

Finally, I would like to thank the members of the 2013 Committee and Office Bearers for all of their work during the year. In particular, I thank Chris Gibbons for her tireless efforts with our accounts and membership database, Ian Lewis for his unceasing efforts to build better relationships between CEGSA and other organisations, particularly National Parks, Athol Jackson who produces our publications year after year and Graham Pilkington who takes on an enormous amount of work on behalf of CEGSA, particularly in securing our records in digital form. Without these people, CEGSA would not be the successful organisation it is at present.

Mark Sefton

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

2013 AWARDS

Spirit of Caving

Aimee Leong

For her enthusiasm for caves everywhere!

Golden Compass

Steve Milner

For explorations of new caves in the Nullarbor sea cliffs.

Stirrers Spoon (Rivetts Reward)

Ian Lewis

For his untiring efforts to foster closer collaboration between CEGSA and National Parks staff.

SECRETARY REPORT

Our General Meetings have had an interesting sequence of talks, all by CEGSA members, including both dry caving and cave diving; fun caving and speleology; all you need to know about Flinders Ranges karst; and why Jenolan caves are where they are.

The website has become the main avenue of contact with CEGSA, however, I still get the occasional phone call from people who like a personal contact. Organizations requesting information, including journalists, almost always use the phone.

Graham Pilkington

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

LIBRARY AND RECORDS REPORT

The major work for 2013 was:

Website

Our website has been kept up-to-date with CEGSA NEWS, Annual Reports and Occasional Papers. The availability of General Meeting minutes on the website has streamlined our meetings.

OzKarst

OzKarst has had the promised upgrade to better cater for the data that it needs to hold. First release of the new version should be made prior to the AGM. It now handles all the data fields stored in the 1985 ASF KID – CEGSA did not use many of these fields because they do not apply to South Australian caves. Caves have been split from surface features so that not only can one cave have many entrances but one “entrance” (karst code) can have many caves – for example, independent caves off a large doline. It handles water and mineral sample results as well as outcrop information. Bibliographical information has been greatly enhanced with the text being available and searchable (after entry!) by converting our “Articles” database to “OzKarst Library” and embedding it into the OzKarst system.

OzKarst Library – was the Articles database

Developed from the Articles database to hold all types of written material, whatever the source.

“Articles” was initially developed to handle the indexing of newspaper articles and this focus has been preserved. However, OzKarst Library can also be approached “top-down” via organization → publications → publication edition or issue → then articles in these. The Articles focus allows searching by text in titles, images, or comments as well as by keywords.

OzKarst Library can be used for all types of cave and karst information in both published and none-published form held in newspapers, journals, books, club records, and other sources such as postcards. The “Reference” section of the OzKarst database has been moved here.

Periodical articles initially catalogued in the Newspaper/Magazine section of the Articles database (because the original list was only for Newspapers) have been moved to a Periodical section (either of caving or none caving).

Library books have been completely re-catalogued from the “CEGSA” database into OzKarst Library. In the process, book series have been recoded so that they reside together on the shelves (eg ASF Conference Proceedings) rather than scattered by date obtained. The Periodical catalogue was also moved from “CEGSA” to OzKarst.

Periodicals Binding

The caving-journal binding project was on hold this year as effort was concentrated on the upgrade to OzKarst. Eleven covers were added including one new periodical of three covers. Total bound is 53 titles with 431 covers.

Major Gifts

CEGSA received two large donations in 2013. The first was from Cate Martin, who has ceased caving and wanted to give her caving books a useful future. It consisted of 23 books, 3 DVDs, a journal, 17 newspaper extracts and 3 cave posters. The second was from Hugh Sangster, following his death,

consisting of 19 books, some monographs on cave/caving, some geological and topological maps, 245 slide photographs, 110 photo prints, a side projector and screen, tripod, slide-racks and side-rack cases. Both gifts are described in more detail in NEWS#231.

Other Additions to Library

A collection of 18 mainly Jenolan books and booklets was purchased as detailed in NEWS#229. Other books purchased included "Malaysian Cave Bibliography" while members donated several items.

Paid Assistance

A student was employed during the year to help with digitising CEGSA's Records. The following items were scanned or completed as a joint effort:

- 300 newspaper and other articles as images.
- 300 monographs, most as images. Average length was about 10 pages.
- Some newspaper/periodical banners (title on cover) were scanned.
- Old Homestead Cave's first south cave visitor logbook typed up.
- Data on the 550 Quartermaine-Wheeler Nullarbor karst features were typed into a database.
- The location sketches were scanned and linked in. Some of these features have not yet been visited by CEGSA, and some have vague location information.
- Caving journal issues scanned/cleaned/or digitised to text for both an electronic copy and for hard-copy binding, including Kempsey SS (11 volumes) and South Africa SA (5 issues).

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

OZKARST & OZKARST LIBRARY

You may wonder at this new title for my report. No longer are OzKarst & Articles database two separate entities.

We have not been given a current working copy of OZKARST this year as Graham has been revamping the database to make it compatible Australia wide. This has held us up in the ability to add new data that we are currently holding ready to enter.

The database previously known as 'Articles' has now been renamed OZKARST LIBRARY.

Graham has changed its name as it is now part of OZKARST & consists of all published items. In last years report we stated we were 80% through a checking process of all records & this took till mid June to complete. Following this task we did a specific check of Border Watch Newspaper records which took another 2 months. In the past 12 months the total records have grown from 8,461 to 8,784.

Scanning is ongoing, with scans being added to their related article as they become available.

Several attempts have been made to sort out UK newspaper problems, but with no success thus far.

Prior to a trip to WA in Sept/Oct, we listed problems that could be best tackled whilst there. Our success with this was quite high.

Field work included -

- A boat trip on the Glenelg River through the full length of the January Kentbruck major fire. This yielded some upgrades & a new feature.
- Byaduk, Vic was visited to upgrade data.
- Kentbruck fire area yielded new & updated data.

Fred Aslin.

LOGBOOK REPORT

No trips were recorded in the Logbook this year. Trip coordinators are not entering trips in the Logbook as required by the Constitution and Rules of the Group. There have been trips reported upon at General Meetings that were not listed in the program or notified at a General Meeting.

Athol Jackson.

PUBLICATIONS REPORT

Four issues of Vol. 58 of CEGSA NEWS were published this year in February, May, August and November (a combined total of 72 pages which is down by 10 on last year) as well as the Annual Report for the AGM in February. The index to Vol. 58 will appear in Vol. 59 No. 1 (hopefully). There has been a small quantity of high quality material submitted but I could always use more, it seems to be getting less each year. There have been quite a few quite important trips that have not been formally reported. Reporting at a General meeting only informs those present at the meeting and not the rest of the Membership. Only a very short précis is included in the minutes. Please write a report for the newsletter so everyone knows what is happening. It is a responsibility of being a trip leader. CEGSA NEWS continues to be available on the website for those members that have indicated they would prefer to receive it electronically. It would be advantageous to both the Group and members to take this option as it saves money for members as well as CEGSA.

Athol Jackson.

EQUIPMENT REPORT

There were a few loans of our vertical gear this year. By the end of the year nearly all our vertical gear was out on loan to 4 different people. (and is still not returned)
 Seven helmets and a ladder are still out on extended loans.
 No gear was bought, damaged or lost.
 I have not received any donations for the use of our gear (yet)

Paul Harper.

SEARCH AND RESCUE OFFICERS REPORT

2013 was a very constructive year in the area of Search and Rescue. Fortunately no major incidents were reported and the year appears to have been incident free.

Late October saw myself, Ken Smith, Craig Challen (CEGWA), Luke Nelson (CEGWA) and John Currie (CDAA) place a rescue cache into the second air chamber of Cocklebidy Cave (Toad Hall). The cache contains lighting, environmental protection, first aid, food and water and a through ground cave radio kindly made by Tim Payne. The second half of the radio is now kept at the Cocklebidy Roadhouse and any divers visiting Toad Hall are encouraged to utilise it. Although this was a fairly major undertaking, the presence of the cache will significantly improve the chances of a good outcome in the event a diver is injured or disabled in Toad Hall.

Two cave rescue training events took place. The first, with the assistance of Tim Payne, was a Sump Rescue Orientation Program (SROP) at Mt Gambier. This program is a basic introduction to the issues surrounding the rescue of an injured caver trapped on the wrong side of a sump. The program was run as a workshop alongside the Cave Divers Association of Australia's 40th Anniversary celebrations in early November. Seven CDAA divers completed the program over a day and a half of talks, practical exercises and mock rescue and body recovery in the cavern zone of Pines Cave.

Just a week later, a Cave Rescue Orientation Program (CROP) was run with the assistance of Graham Pilkington and Ian Lewis, for the Naracoorte guides at Naracoorte Caves. Also in attendance was South Australian Ambulance Service Special Operations Team (SOT) paramedic Dean George, and CFS Regional Commander SE John Probert (a caver himself). Deborah Craven-Carden who was the head guide helped organize an excellent weekend and after the usual talk-fest we finished with some valuable stretching and first aid exercises in the caves.

So a quiet first half of the year followed by some frenetic activity, I hope to build on these activities further in 2014.

Richard Harris.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

ASF REPRESENTATIVE REPORT

Our Stan Flavel continued as the ASF's President. A quiet year.

Graham Pilkington.

SOUTH AUSTRALIAN SPELEOLOGICAL COUNCIL REPRESENTATIVE REPORT

Several joint-club trips between CEGSA, FUSSI and the Scouts were held during the year – all proved that the system works well and more are already planned for next year. Cross-membership is increasing, and provided that each club maintains its focus and does not try to be everything for everyone, all clubs will benefit. Because of our close cooperation, there was again no need for any official Speleological Council meeting.

Graham Pilkington

APPROVED CEGSA TRIP LEADERS

Name	Caving Leader level
Marie Choi	Horizontal, Laddering and Vertical
Stan Flavel	Horizontal and Laddering
Grant Gartrell	Nil
Chris Gibbons	Nil
Paul Harper	Horizontal, Laddering and Vertical
Richard Harris	Horizontal
Lance Hoey	Horizontal and Laddering
Peter Horne	Horizontal and Laddering
Peter Kraehenbuehl	Horizontal, Laddering and Vertical
Ian Lewis	Horizontal and Laddering
George MacLucas	Horizontal, Laddering and Vertical
June MacLucas	Horizontal
Tim Payne	Horizontal, Laddering and Vertical
Graham Pilkington	Horizontal and Laddering
Eddie Rubessa	Horizontal and Laddering
Mark Sefton	Horizontal and Laddering
Matt Smith	Horizontal and Laddering
Gary Woodcock	Horizontal and Laddering
Michael Woodward	Horizontal, Laddering and Vertical

All the above named are also CEGSA Trip Coordinators.

Members may query the classification of any Trip Leader at any time with the committee.

It is a requirement that each trip be organised by an approved Trip Coordinator to be classed as an official CEGSA trip. It is also a requirement that dependent party trips be led by an approved Trip Leader at the appropriate skill level for the cave being entered.

PRIVACY OF INFORMATION STATEMENT

This privacy statement has been prepared in order to demonstrate the commitment of CEGSA Inc. to protect the personal privacy of its members.

No superfluous Data Collection

- * CEGSA aims to collect as little information as it can; only collecting the data which is necessary to maintain and improve its service to members.

Collection of Personal Information

- * Information will be collected by means of registration or application for membership forms provided to prospective members and current members.
- * Information will not be collected by the club without the member's consent.

What personally identifiable information will be collected?

- * Your name, address, telephone numbers and Email address.

The period for which the information will be held.

- * For as long as the Group requires the information.

The information collected may be used for the following purposes.

- * To send you CEGSA NEWS and other club information.
- * To register you with the Australian Speleological Federation.
- * To be published in the CEGSA Annual Report.
- * As a means of contact by other members.
- * To identify any contributions a member has made to the Group.
- * To follow up on any data collected or any item borrowed from the Group, even after leaving the Group.

Disclosure of personal information

- * If you do not wish to have your contact details published in the Annual Report or CEGSA NEWS you must request same in writing to the Group.
- * In the unlikely event of an investigation it will, however, provide information to a law enforcement agency, if they have exercised a warrant for the inspection of its records.

Security

- * CEGSA uses reasonable precautions to keep the personal information disclosed to it, secure.

Accountability

- * CEGSA offers members the opportunity to view all information that it maintains about them and to have any inaccuracies in this information corrected. It may ask for identification in the interest of security.

Notification of Changes

- * If CEGSA decides to change its privacy policy, it will post the changes in CEGSA NEWS so that all its members are always aware of what information it collects, how it is used and under what circumstances it may be disclosed.

Contact us

- * If, at any time, you believe CEGSA has not adhered to its stated policy, please contact the Secretary, in person, or by mail to its Postal Address: PO Box 144, Rundle Mall, SA 5000.

CAVING ACTIVITIES

ADELAIDE HILLS & FLEURIEU PENINSULA

The only known visit to a cave in this region in the past year was to 5A25 at Sellicks Hill. The purpose of the visit was to re-secure the entrance gate to this cave after it had been found to have been interfered with by persons unknown sometime this Spring. Presumably a cordless power tool of some sort was used to remove the relatively inaccessible locks from the gate. There was evidence that the intruders had progressed a fair way down the cave, with a change to the way a ladder had been suspended, but fortunately little damage was observed, other than to an electric cable, although the inspection was only cursory.

The cave gate has now been re-locked as intended and has remained that way for about three months. The internal ladder has been removed. No evidence of any further unauthorised attempts to access the cave has been detected. A telephone contact number for information has been reinstated on the cave gate. It is still intended that further airflow measurements be carried out in this system in the near future as a guide for future exploration.

It is also worth noting a significant anniversary has just passed. On Tuesday 10 December, 2013 it was the 20th anniversary of the large blast carried out by Southern Quarries for the purpose of “implosion” the largest known chamber in Sellicks Hill Quarry Cave 5A20, which is now known only by its survey, photographic and video records, and a number of reports written about this sad and quite shameful event. The blast was detonated on Friday 10 December 1993, the day before a South Australian State election, and it was widely considered that this timing was deliberate. It is particularly sad not only for the fate of a major South Australian cave, but because despite good intentions on the part of a number of people, and widespread community concern at the time, we have not made any significant advances towards ensuring that any lessons have been learned and that history cannot repeat itself. Regrettably for the future of cave and karst conservation in this state where potential conflict with quarrying operations may be encountered, “out of sight” is still very much “out of mind”.

Grant Gartrell.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

EYRE PENINSULA

No trips were reported.

Graham Pilkington

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

FLINDERS RANGES

Two trips to narrina were undertaken in 2013, one during easter and the other in october. On both occasions the western end of Narinna was visited.

Extensive surface exploration was conducted for collapses and solution holes and we were not disappointed as numerous features were found. At both times temperatures were above thirty degrees Celsius making conditions uncomfortable.

A new form of examining the viability of pursuing constrictive solution tubes was adopted by ray gibbons, involving the use of a Go-Pro camera attached to poles with a truck Luxeon light and lowering it as far as possible enabling us to assess whether to devote time for further pursuit or to abandon it.

Trip participants were Ray Gibbons and Eddie Rubessa.

Eddie Rubessa.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

KANGAROO ISLAND

Only one short CEGSA visit to Kangaroo Island was made this year. Because of the considerable potential for new discovery, all trips, no matter their duration, are by definition too short.

A couple of visits are planned for the coming year. Ongoing projects range from continued systematic exploration and survey within the main Kelly Hill system as well as a number of associated minor caves through to continuation of the survey of K11 which is now known to be quite a complex cave.

Grant Gartrell.

Following my retirement I have been plotting all my survey data for cave locations around Kelly Hill against 2011 ortho photos. The surveys are those that were done on a series of trips 20 years ago. From the plots I am deriving a series of grid references as there appears to be very few of the caves GPS'd. Katrina Wills from DEWNR has supplied some co-ordinates which I assume are GPS points. These are matching the derived values reasonably well. A trip in May 2014 is planned to verify the data. There are some 50 features awaiting the allocation of numbers so these will be given temporary numbers early in 2014.

Kevin Mott.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

LOWER SOUTH EAST (Dry)

Caves numbered	3
Features recorded	3
Latest number	L556

During the year Nature Glenelg Trust worked with CEGSA to produce a karst database of the Lower South East for Dept of Environment Water and Natural Resources (DEWNR). The functional side of this database provides a GIS tool to enable researchers to identify sites that contain biological or environmental, archaeological or palaeontological values. The South East was divided into cells. Each cell lists the cave numbers and the values of each cave. If the researcher needs information regarding the cave they can contact CEGSA. Only caves on public land or on a public register are shown with a point value. A facility exists for DEWNR or CEGSA to exchange updated information.

A new access stairway was constructed to give divers easier access to Fossil Cave at Tantanoola. A new water monitoring point was also established to record levels as the existing point is no longer accessible.

A collapse some 4m in diam and 5m deep at a house in Mount Gambier caused some concern for the owner but consultants were able to engineer a solution to preserve the house.

An interesting karst spring near Beachport was documented.

Several trips by FUSSI looked at various caves in the region.

Kevin Mott.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

MURRAY PLAINS

Several trips went to Punyelroo and Gloop caves. These were often led to entice people into caving.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

NULLARBOR PLAINS

The VSA trip utilized the flying skills of Ken Boland and visited an area north of Koonalda.

There have been numerous diving trips this year; most going to the Roe Plains where again more kilometres of submerged tunnels were found. Some research is being conducted by others on the appearance of "hot spots" in the cave lakes. It's postulated that these are "springs" and may be the key as to why the caves are found where they are and the size that they attain.

Other dry caving trips included surveying in Old Homestead Cave and the locating and documentation of some Quartermaine-Wheeler as well as other features.

A special permit is now required to go caving on the Nullarbor Plain in South Australia. Trip Leaders can obtain the relevant details from the Committee.

Graham Pilkington.

TORRENS

No trips went.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

UPPER SOUTH EAST

Caves numbered 0
Features recorded 5
Latest number U251

The CEGSA/VSA dinner was a highlight and congratulations to VSA for a well organised event. An interesting observation was the number of young blood that VSA were able to produce. The older CEGSA contingent were able to hold their own in the sports and games however.

A series of small features in the Mount Light area were documented during the year. Ian Lewis helped lead a trip by Ruth Lawrence of Latrobe Uni to the area. Steve Milner led a trip into Blackberry Cave so CEGSA members and DEWNR staff could familiarise themselves with the cave. Trips also visited S102, Beekeepers and U132.

A trip to Fox Cave looked at the issues of rescue in the event of someone being injured. As a follow on a rescue seminar was held with participants from DEWNR, CEGSA, SES and CFS. It would be good to see a full training/exercise trip involving the caving clubs and emergency services as it is a long time since one was held and everyone needs to hone their below ground search and rescue skills.

The monitoring of bats in Bat Cave is being done by Friends of Naracoorte Caves

Kevin Mott.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

YORKE PENINSULA

7 trips were made to Corra Lynn Cave of which 2 were for schools, and 2 were by FUSSI. The CEGSA trips were primarily for fun with a bit of navigation training thrown in.

Town Well Cave is still awaiting an arrangement with the local Council to allow us to fix the collapsing entrance doline.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

INTERSTATE AND OVERSEAS (excluding the Nullarbor plain)

Several of our members took part in the ASF conference and post conference trips in New South Wales over the summer. Ken Smith went diving at Buchan and Mark and Karin Sefton joined in the annual ASF expedition to the Judbarra-Gregory National Park where more than 50 km of hitherto undiscovered cave passages have been surveyed in the past three years. Michael Woodward went caving in New Zealand, Ken Smith presented a talk at a diving conference in the UK and did some cave diving there and in France. Grant Gartrell took part in the ACKMA conference in New Zealand

Mark Sefton.

TREASURERS' STATEMENT

The Income & Expenditure and Balance Sheet have been prepared from a reconciled Cash Book with the Bank Statements that reflect the operations of the Club for the year ended 31st December 2013.

The Income & Expenditure Statement shows an Operating Surplus compared to the 2012 year. This can be accounted for in no additional Extraordinary spending this year and other Operating Income and Expenses remaining stable.

****note1** The CEGSA subscriptions collected in 2013 include \$495.00 for the 2014 year.

****note 2** The ASF fees collected in 2013 include \$1061.00 for the 2014 year. The ASF Levy and Insurance has changed from the previous year. CEGSA receives the members ASF fee approximately 9 months behind the ASF setting the current year Levy.

The financial standing of the Club has continued to remain sound for the year.

Chris Gibbons.

INDEPENDENT AUDIT REPORT

To the President and Members of the Cave Exploration Group (South Australia) Incorporated

Income and Expenditure Statement and Balance Sheet for the period 1 January 2013 to 31 December 2013

I have audited the Income and Expenditure Statement and the Balance Sheet for 2013. In my opinion the Statement fairly presents the financial transactions of the Group for the period 1st January 2013 to 31st December 2013 and the Balance Sheet fairly presents the financial position of the Group at 31st December 2013.

Scope and Procedures

In order to reach these opinions, my audit has included an examination of invoices received, receipts for payments, supporting records, Bank Current Account Statements, Bank Investment Account Statements, Deposit Book, Cheque Book, Receipt Book for 2013 and the financial reports for 2012.

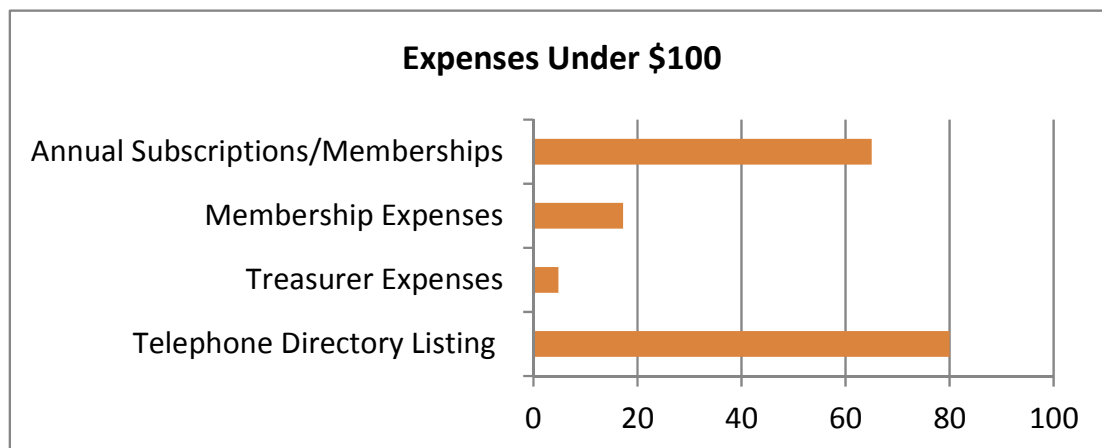

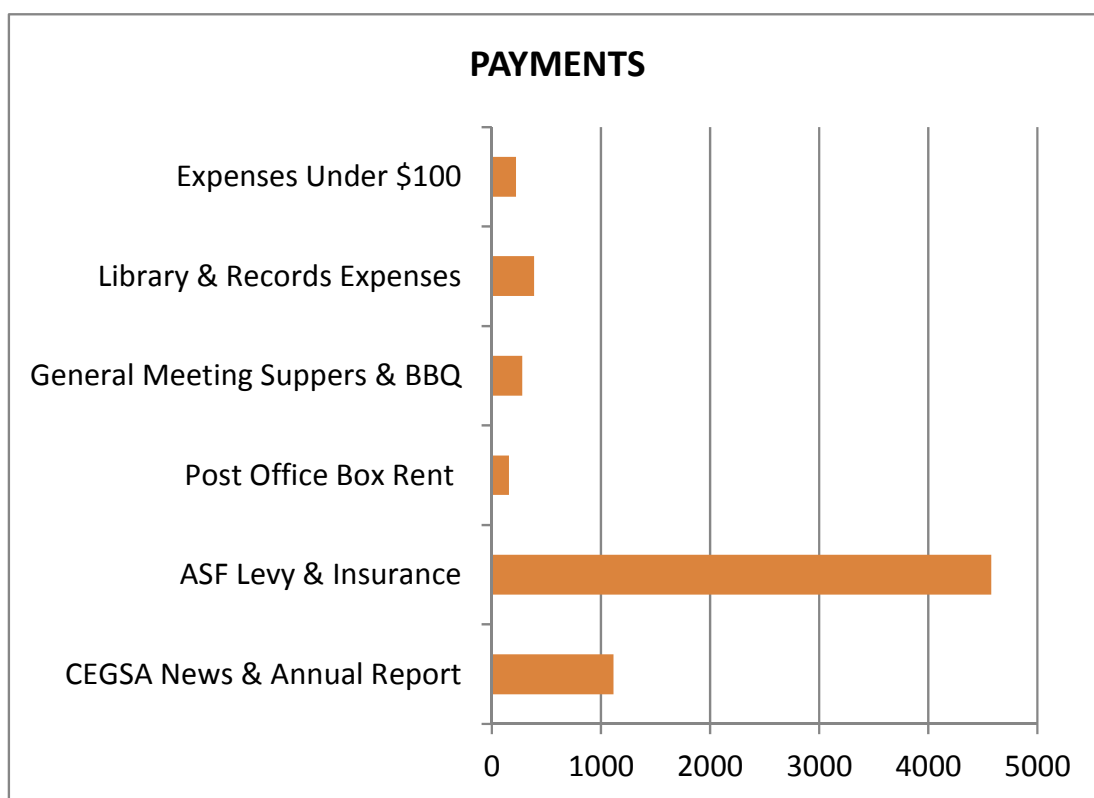

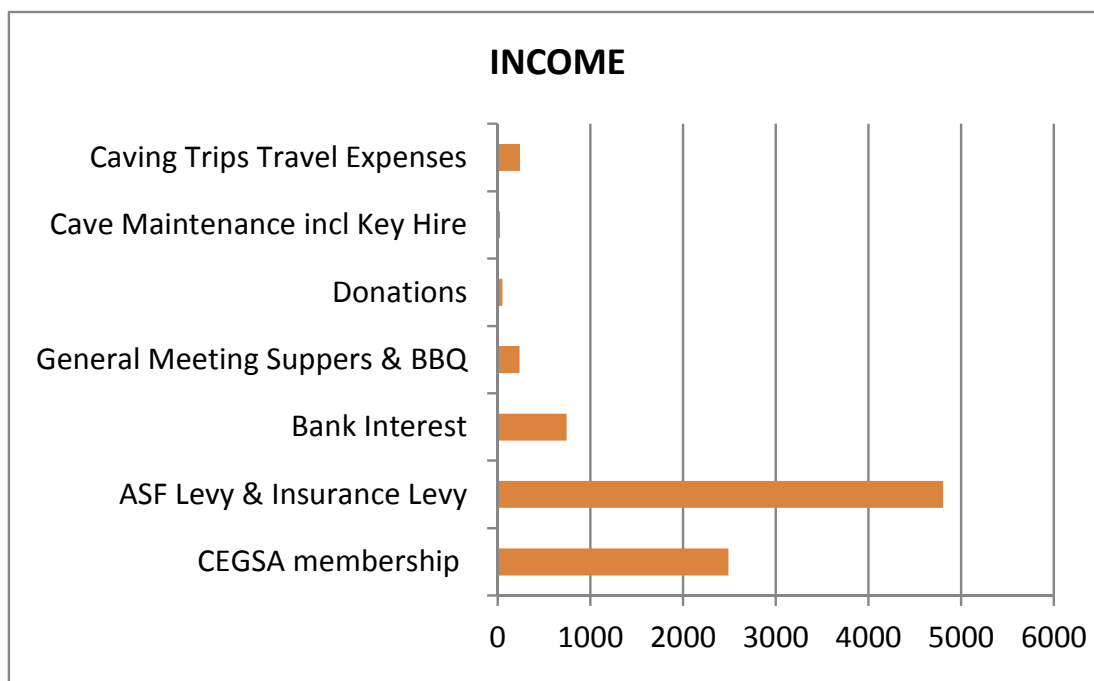

J. Paulga
Honorary Auditor

12 January 2014
