Nullarbor Karst Project Steering Committee (WA)	Paul Hosie
Kanawinka Geopark Liaison	Ian Lewis

PRESIDENT'S REPORT

Due to unforeseen personal circumstances, I was not able to attend to some CEGSA affairs this year. But glad to say the club continued anyway!

Our joint activities with FUSSI and Scouts has continued and expanded.

At Naracoorte we have had a rewarding exchange of ideas and activities with National Parks, including staff training in Search and Rescue. We hope that this continues after Deborah Craven-Carden leaves in 2015.

General Meetings were poorly attended even if a quorum was usually attained. Members are missing out on some fascinating talks and presentations. These meetings are also a good place to find out about the latest gear and activities. One meeting was all about caving lights from carbide to LED. It gave members an opportunity to examine the different LED headlights now available and compare lumens, cost, and versatility.

An updated version of the South Australian Adventure Activity Standards (Recreational Caving) has been drafted and should be released in 2015. CEGSA made a significant contribution to this standard. It's not a list of do's and don'ts but a set of helpful guidelines as to what to do and how to organise it. It does not cover the technical aspects of caving but concentrates on management.

Graham Pilkington

2014 AWARDS

Leather Medal (Leather Patch class)

Neville Skinner

For his shorts so they'll never rip again.

Leather Medal (Orientation class)

Aimee Leong

With an arrow to show which side is up.

Award of Merit

Richard Harris

For outstanding efforts in Cave Search and Rescue in Australia

Committee

SECRETARY REPORT

My first year as secretary was a quiet one, mostly settling into the duties required and learning the processes CEGSA employs to create, track and distribute minutes. I've enjoyed the experience so far, and am looking forward to putting my own mark on the position in the coming years.

Matt Smith.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

LIBRARY AND RECORDS REPORT

The major actions for 2014 were:

OzKarst and OzKarst Library

The ability to compare and amalgamate data from disparate databases has finally been achieved. This enables cavers to use their own copy of OzKarst to enter new and updated data instead of having to put these in a separate otherwise empty OzKarst for submission to a central database.

The file naming convention has been altered to differentiate between surface features, caves, and rock exposures in files specific to them. These might contain photographs, maps or other images and documentation.

A graphical image display program is now supplied with OzKarst to expand the range of file types that can be handled, increase the functionality of display, and removes the user's need to supply their own driver for each file type.

Biological photographs can now be fully documented as for other photographs. Multiple photographs of a specific specimen are now allowed.

Much time and effort has been spent on the removal of (hopefully) most of the glitches that come with new software. However, because people are always wanting more with less effort, new problems keep popping up.

The Library is now much more functional as a part of the OzKarst system. Entries can be accessed from almost any part of OzKarst so that users can lookup a specific entry pertaining to the item of interest. For example, if damage to a cave is noted in an article, then the report of the damage in OzKarst can reference this article and even open the article at the specific page.

Comparing and amalgamating Libraries is the same as for OzKarst but restricted to just the Library. Any adjustment made in Library to an article's data set or index number is automatically adjusted in OzKarst to keep the reference intact.

There are several functions that will be completed or added next year: Maps, Surveys, Geology, and Satellite imagery in OzKarst; and for Library, keyword amalgamation/automation with OzKarst enabling Library to pull up OzKarst data just as OzKarst can pull up Library articles. But for users, the best addition will be the automated installer for upgrades!

OzKarst as a Karst Archive

CEGSA is starting to receive data on interstate areas from other clubs to enter into OzKarst as an archival repository. I intend to visit these clubs in 2015 to instruct them on how to enter the data directly into OzKarst. HCG supplied information on 2CV this year. We already had some information on the Kimberley (from WASG) and Vanuatu (from our Harry Harris). CEGSA has been adding its own data about Victorian karst from field trips led from Mount Gambier by Dave and Fred.

Periodicals Binding

The caving-journal binding project was on hold again this year as effort was concentrated on the development of OzKarst. Five covers were added giving a total bound of 53 titles with 436 covers.

Additions to Library

Several books were purchased for the library.

If anyone has any journals, books, or other publications that are about caves or caving (or maybe contain a one-off article), then CEGSA will be pleased to accept your donation. Better to have them available for reference than gathering dust.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

LOGBOOK REPORT

Trips were recorded in the Logbook until this year. Trip coordinators now enter coming trips onto the website Calendar. This has the advantage that everyone, including prospective members, can see what trips are available. Also the contact details and extended trip itinerary can be viewed. This does not seem to be working. Trip coordinators are not entering trips in the appropriate places as required by the Constitution and Rules of the Group. There have been trips reported upon at General Meetings that were not listed in the program, notified at a General Meeting or placed on the Calendar. Trip leaders and coordinators should be aware that without recording the trip they may be liable to litigation and are not covered by insurance if anything goes wrong on the trip.

Athol Jackson.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

PUBLICATIONS REPORT

Four issues of Vol. 59 of CEGSA NEWS were published this year in February, May, August and November (a combined total of 110 pages which is up by 38 on last year) as well as the Annual Report for the AGM in February. The index to Vol. 59 will appear in Vol. 60 No. 1 (hopefully). There has been a reasonable quantity of high quality material submitted but I could always use more. There still are quite a few trips that have not been formally reported. Reporting at a General meeting only informs those present at the meeting and not the rest of the Membership. Only a very short précis is included in the minutes. Please write a report for the newsletter so everyone knows what is happening. It is a responsibility of being a trip leader. CEGSA NEWS continues to be available on the website for those members that have indicated they would prefer to receive it electronically. With the change in calculating membership fees it is even more advantageous to both the Group and members to take this option as it saves money for members.

Athol Jackson.

TRAINING REPORT

There have been no formal CEGSA Training events conducted during 2014, however an informal Vertical Skills practice weekend was held with members of FUSSI and the Scout Caving Group at Mairs Cave in September. Planning is already under way for further joint club training in 2015, including a Search & Rescue exercise in May.

Matt Smith.

ASF REPRESENTATIVE REPORT

I attended the ASF Council Meeting in January 2014, representing both CEGSA and FUSSI. Stan Flavel retired as the ASF's President later on in the year.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-

SOUTH AUSTRALIAN SPELEOLOGICAL COUNCIL REPRESENTATIVE REPORT

A meeting was held this year in the guise of a joint-club meeting between CEGSA, FUSSI and the Scouts. We decided that the meetings might as well be called SASC meetings because that is what they are.

It was decided to investigate the production of a joint-club newsletter. There are many reasons that have put forward for this. Some articles are appearing in both CEGSA and FUSSI newsletters. This is because some trips are joint trips; also a few of our members belong to both organizations and both organizations then require a written report. It is envisaged that each club would have its own section for specific news and information. CEGSA already prints the FUSSI calendar in our NEWS to facilitate members attending their trips just as FUSSI members can attend our trips – this might exclude some exclusive trips and always requires notification and Trip Leader agreement. Scout trips are usually exclusive to Scouts because of the requirements of their organization but some can still be joint trips, especially when cavers are helping out. The common NEWS would ensure that each club is kept informed of the activities of the others. One production would ease the administrative burden of the other two clubs.

Every year, each club is to specifically organize a joint-club trip and attendance will be encouraged by the other two clubs.

Graham Pilkington

APPROVED CEGSA TRIP LEADERS

Name	Caving Leader level
Marie Choi	Horizontal, Laddering and Vertical
Stan Flavel	Horizontal and Laddering
Grant Gartrell	Trip Coordinator Only
Chris Gibbons	Trip Coordinator Only
Paul Harper	Horizontal, Laddering and Vertical
Richard Harris	Horizontal
Lance Hoey	Horizontal and Laddering
Peter Horne	Horizontal and Laddering
Peter Kraehenbuehl	Horizontal, Laddering and Vertical
Ian Lewis	Horizontal and Laddering
George MacLucas	Horizontal, Laddering and Vertical
June MacLucas	Horizontal
Steve Milner	Horizontal, Laddering and Vertical
Tim Payne	Horizontal, Laddering and Vertical
Graham Pilkington	Horizontal and Laddering
Eddie Rubessa	Horizontal and Laddering
Mark Sefton	Horizontal and Laddering
Matt Smith	Horizontal and Laddering
Tom Szabo	Horizontal and Laddering
Gary Woodcock	Horizontal and Laddering
Michael Woodward	Horizontal, Laddering and Vertical

All the above named are also CEGSA Trip Coordinators.

Members may query the classification of any Trip Leader at any time with the committee.

It is a requirement that each trip be organised by an approved Trip Coordinator to be classed as an official CEGSA trip. It is also a requirement that dependent party trips be led by an approved Trip Leader at the appropriate skill level for the cave being entered.

PRIVACY OF INFORMATION STATEMENT

This privacy statement has been prepared in order to demonstrate the commitment of CEGSA Inc. to protect the personal privacy of its members.

No superfluous Data Collection

- * CEGSA aims to collect as little information as it can; only collecting the data which is necessary to maintain and improve its service to members.

Collection of Personal Information

- * Information will be collected by means of registration or application for membership forms provided to prospective members and current members.
- * Information will not be collected by the club without the member's consent.

What personally identifiable information will be collected?

- * Your name, address, telephone numbers and Email address.

The period for which the information will be held.

- * For as long as the Group requires the information.

The information collected may be used for the following purposes.

- * To send you CEGSA NEWS and other club information.
- * To register you with the Australian Speleological Federation.
- * To be published in the CEGSA Annual Report.
- * As a means of contact by other members.
- * To identify any contributions a member has made to the Group.
- * To follow up on any data collected or any item borrowed from the Group, even after leaving the Group.

Disclosure of personal information

- * If you do not wish to have your contact details published in the Annual Report or CEGSA NEWS you must request same in writing to the Group.
- * In the unlikely event of an investigation it will, however, provide information to a law enforcement agency, if they have exercised a warrant for the inspection of its records.

Security

- * CEGSA uses reasonable precautions to keep the personal information disclosed to it, secure.

Accountability

- * CEGSA offers members the opportunity to view all information that it maintains about them and to have any inaccuracies in this information corrected. It may ask for identification in the interest of security.

Notification of Changes

- * If CEGSA decides to change its privacy policy, it will post the changes in CEGSA NEWS so that all its members are always aware of what information it collects, how it is used and under what circumstances it may be disclosed.

Contact us

- * If, at any time, you believe CEGSA has not adhered to its stated policy, please contact the Secretary, in person, or by mail to its Postal Address: PO Box 144, Rundle Mall, SA 5000.

CAVING ACTIVITIES

ADELAIDE HILLS & FLEURIEU PENINSULA

Last year's report noted that someone had gained access to 5A25 at Sellicks Hill by cutting relatively inaccessible locks off. The gate has again been damaged in January 2015, clearly by using an angle grinder with cutting discs, and is in the process of being repaired and strengthened yet again. The cave has not yet been entered since this latest onslaught to assess any damage, but it is likely that at the very least broken glass will need to be removed if the remains of the beer bottles around the gate are any indication.

Perhaps a bigger but related issue is the loss of access to other known Fleurieu Peninsula caves. A number of known caves and karst features on the lower Fleurieu Peninsula occur on and under private property, and while in most instances the owners of the properties may not even be particularly aware of the actual or potential significance of these features, the increased need for security against unwanted visitors and loss of old contacts through changes of ownership are currently a cause for concern.

Access to at least four separate groups of caves and karst features for which we have had good access in the past is currently hanging in the balance. Two of these areas are as a result of changing ownership, and the other two are for personal family reasons. In each instance there may be an opportunity in the future for respectful and sensitive discussions, but we must respect the rights of owners old and new, make our case for consideration thoroughly, and be prepared to be patient while attempting to earn the trust of those on whose permission we depend.

Our recent experiences with the 5A25 gate should make it clear to us why landowners in the region, and probably right across the state, are becoming increasingly concerned about security.

On a more positive note, there has been some recent interest in the coastal caves between Second Valley and Cape Jervis. Instead of concerns about landowner relations, the emphasis is on weather and calm seas. Even something as obvious as long known sea caves has some mystery associated. References in very old newspaper articles suggest that there is at least one cave of relatively impressive dimension in the area for which we do not have a current location. Additionally, a couple of the known sea caves were allocated "A" numbers many years prior to the advent of GPS, and there is some uncertainty as to what was which, and why other similar caves were not numbered. The new interest in this area should see all these features properly recorded, and that will be a good thing.

Grant Gartrell.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

EYRE PENINSULA

Although no CEGSA trip was lead to Eyre Peninsula, we have an enthusiastic new member who lives in Cleve and has recommenced exploration. Dan has been looking up all references to caves on published maps and from other places then visiting to see what's there. He is keen to improve our Records of "local" caves and has provided recent photographs of E13 (September Sinkhole, Deathtrap), of both inside and outside. It should be noted that when Jerry de Graff did his work over Eyre Peninsula, that GPS was not available, hence we lack accurate locations for all but a few of the hundred or so known features.

A trip is planned for next Easter, jointly with FUSSI, to return to this little-visited area.

Graham Pilkington

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

FLINDERS RANGES

The areas of Wirrealpa and Narrina have a constant natural appeal about it, the geology predominately Parara and Wilkawillina limestone surrounded by the higher quartzite ranges, contains some very exciting features recently found on the Easter trip, while a known feature was enlarged, it yielded a considerable amount of air flow. A subsequent trip on the June long weekend to another feature found several years ago was excavated of leaf and twigs delivered 12.0 metres more passage with a strong breeze issuing, more passage was observed but was reserved for later trip. There was another feature looked at, but a rocky protuberance impeded our progress.

Eddie Rubessa.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

KANGAROO ISLAND

It is disappointing to report that there have been no CEGSA trips to Kangaroo Island recorded for the last twelve months, despite the best of intentions.

More effort needs to be put in to improving our knowledge and understanding of several cave systems on the Island, and further systematic exploration and survey is still very much needed at Kelly Hill.

Grant Gartrell.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

LOWER SOUTH EAST (Dry)

Numbered	6	
Features recorded	0	
Last No		562
Temp L XKRM		755
Temp L XDJL	3	

During the year time was spent reconciling the listings for minor features and caves for which there is very little data. These features were allocated temporary X numbers to bring them in line with OzKarst. Hopefully these can all be input into OzKarst during the year.

Fred and Dave continue inputting data into OzKarst for the Lower South East and Glenelg River. This is done over three mornings each week. They have had trouble keeping up with the changes during the year

Discussions were held with Forestry SA to re-establish dialogue between them and CEGSA. The data held by both organisations is being examined digitally to see where our records differ and/or overlap.

Trips of note during the year were a surveying trip by Martin Fresacher. Several new caves, L524 & L525 were visited as a training exercise to teach Martin surveying techniques. FUSSI ran several trips and caves visited included L18, L60, L86, L144 and L322. Peter Horne and Ian Lewis visited L14 during the AGM of the CDAA to collect faunal samples from various sites in the sinkhole.

A camper in one of the caravan parks dropped the wheel of his vehicle into a cavity 7m diam x 5m deep. No leads heading off were found but there are reports of earlier collapses in the area. The collapse has since been backfilled.

The recent Tantanoola bushfire has exposed an area of significant sinkhole development and it is planned to document these during the year.

Kevin Mott.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

MURRAY PLAINS

Many trips went to the usual two caves – Punyelroo and Gloop.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

NULLARBOR PLAINS**Trips**

The VSA trip of Ken Boland was in May-June this year allocating another 206 N codes.

New Data

Data from the 2013 and 2014 VSA trips were supplied to Records.

HCG also supplied data on 109 features.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

WET CAVING

I'm afraid that as in recent years, I haven't been very involved in the Lower South East during 2014 due to health and money issues as always, undertaking just a single research diving trip (5L14, Ela Elap stromatolites with Lewy) in that period. I also don't know of any other specific trips/discoveries during the year and feel that perhaps Motty would be better placed to assist with info re these issues?

I also had to cancel (yet again) our planned trip to Narrina in November due to 41oC heatwave predicted for that weekend (it was 42oC)! Hope to run it again in May.

Peter Horne.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

TORRENS

No trips went.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

UPPER SOUTH EAST

Numbered	0	
Features recorded	0	
Last No	251	
Temp UXKRM	443	

As with the Lower South East time was spent reconciling the listings for minor features and caves for which there is very little data. These features were allocated temporary X numbers to bring them in line with OzKarst. Hopefully these can all be input into OzKarst during the year.

Discussions were held with Forestry SA to re-establish dialogue between them and CEGSA. The data held by both organisations is being examined digitally to see where our records differ and/or overlap.

Department of Environment, Water and Natural Resources is updating management plans for the Naracoorte Caves National Park so an updated listing of caves in the park has been provided to the Department. Due to changes in the boundaries their old listing was out of date.

Early in the year Ian Lewis led a trip for La Trobe University with a project to resurvey Blanche Cave. The original map was produced in the 1960's with some updates done in the 1980's. Cavers from FUSSI and CEGSA gathered at Naracoorte in October to celebrate FUSSI's 40th birthday. The 20th anniversary of World Heritage listing for the Naracoorte Caves was celebrated in November. It was great to catch up with some of the former cave guides. October also saw some cave rescue techniques demonstrated by Steve Milner.

Kevin Mott.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

YORKE PENINSULA

7 trips were made to Corra Lynn Cave of which 2 were for schools, 1 was by FUSSI and 4 by CEGSA. These trips were primarily for fun with a couple for navigation training. The Gavin Prideaux fossil extraction trip never eventuated.

Coobowie Corner Cave was visited for the first time in a couple of decades and an accurate location obtained. Lance and Barbara also got hold of a report on the cave written by a local as a school project. This included some history of the cave.

There has been no progress in an arrangement with the local Council to allow us to fix the collapsing entrance doline of Town Well Cave.

Graham Pilkington.

-0-0-0-0-0-0-0-0-0-0-0-0-0-0-

INTERSTATE AND OVERSEAS (excluding the Nullarbor plain)

Neville Skinner and Mark Sefton joined a FUSSI-run week long trip to Yarrangobilly in New South Wales early in the year and visited several well decorated and extensive caves there. Aimee Leong and Mark Sefton plus two other FUSSI members also took part in the annual Judbarra-Gregory expedition in the Northern Territory during which over 20 km of cave passages were surveyed and a new cave system which has only been explored over the past four years is already 35 km in length. The total length of surveyed cave passages in the park is now in excess of 270 km. At the beginning of the year, Richard Harris and Ken Smith continued their deep diving explorations in the Pearce Resurgence in New Zealand. Neville Skinner spent three weeks in the Philippines and visited several caves there.

Mark Sefton.

CEGSA 50th Year Book Allocation

Balance 31/12/2013	<u>683.99</u>
Balance 31/12/2014	683.99

TREASURERS' STATEMENT

The Income & Expenditure and Balance Sheet have been prepared from a reconciled Cash Book with the Bank Statements that reflect the operations of the Club for the year ended 31st December 2014.

The Income & Expenditure Statement shows a slightly lower Operating Surplus compared to the 2013 year. This can be accounted for in Extraordinary spending this year for the OzKarst Trademark Application from the General Bank Account instead of the Investment Accounts. Other Operating Income and Expenses have remained reasonably stable.

****note1** The CEGSA subscriptions collected in 2014 include \$741.00 for the 2015 year.

****note 2** The ASF fees collected in 2014 include \$1159.00 for the 2015 year. The ASF Levy and Insurance has not changed. CEGSA receives the members ASF fee approximately 9 months behind the ASF setting the current year Levy.

The financial standing of the Club has continued to remain sound for the year.

Chris Gibbons.

INDEPENDENT AUDIT REPORT

To the President and Members of the Cave Exploration Group (South Australia) Incorporated

Income and Expenditure Statement and Balance Sheet for the period 1 January 2014 to 31 December 2014

I have audited the Income and Expenditure Statement and the Balance Sheet for 2014. In my opinion the Statement fairly presents the financial transactions of the Group for the period 1st January 2014 to 31st December 2014 and the Balance Sheet fairly presents the financial position of the Group at 31st December 2014.

Scope and Procedures

In order to reach these opinions, my audit has included an examination of invoices received, receipts for payments, supporting records, Bank Current Account Statements, Bank Investment Account Statements, Deposit Book, Cheque Book, Receipt Book for 2014 and the financial reports for 2013.

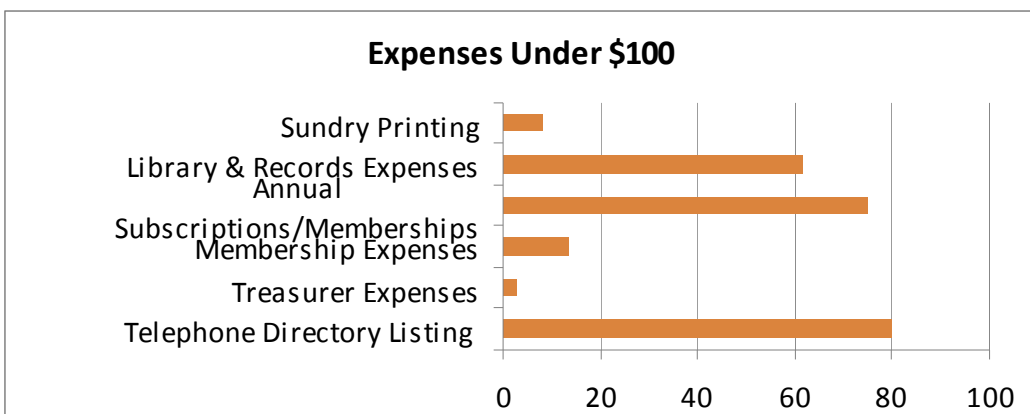

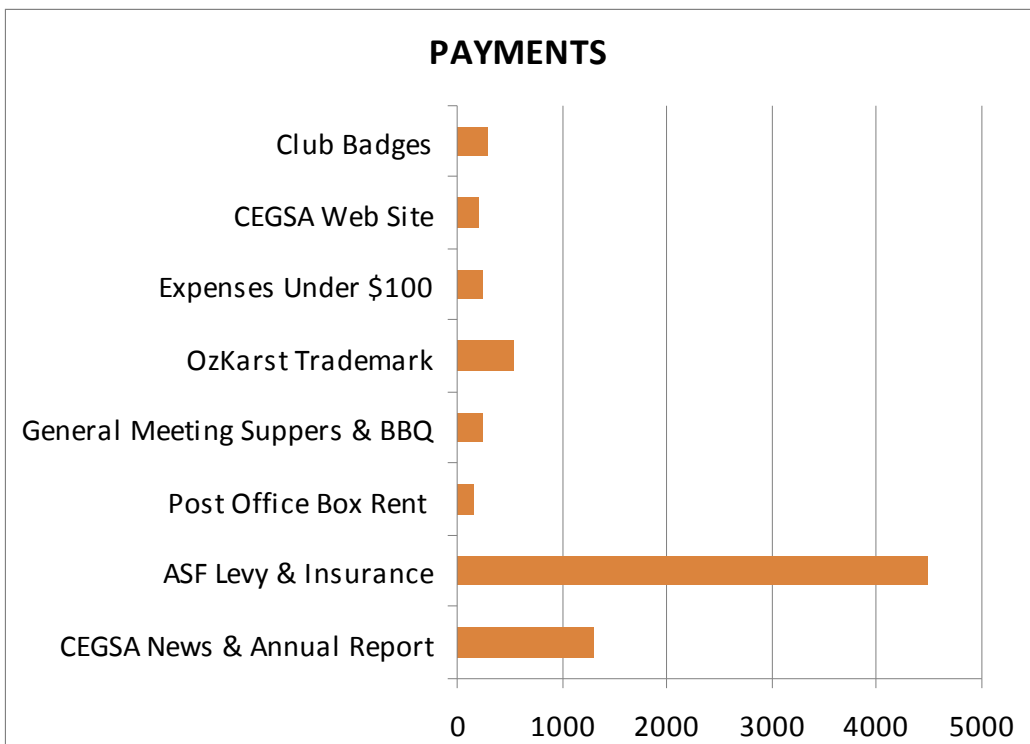

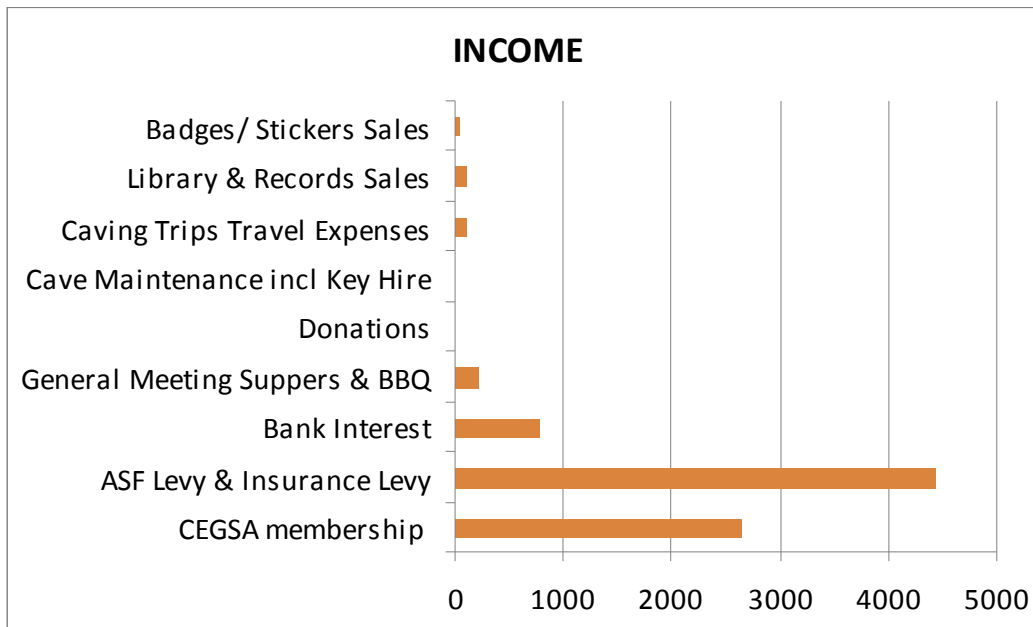

J. Paulga
Honorary Auditor
