Finally it is reported that with so many mouths to feed Alan Hill finds the GPO. box too cramped and correspondence should be sent to Perseverance Road Tea Tree Gully.

The Group were privileged to receive a lecture on Past Meetings the South East from Dr. Hossfeld. The Dr. dealt with the caves of the S.E. and their history.

June Lynn visited S.A. on her way to Melbourne and PERSONAL when returning to the United Kingdom. Ken and June are living in London and anticipate being there for some time.

Full Members will have been issued by now with Occasional Paper No2 "A Preliminary Report" by J.N.JENNINGS of the A.N.U. This will be of considerable use and interest to those who have been able to visit the areas mentioned. We extend our sincere thanks to Joe for having prepared this paper from material and surveys obtained during the 1956-7 CEGSA...ASF trip to the plains.

With this edition is a list of the surveys made by the Group since 1955. A Dyeline machine has become available and stocks of maps are now available for sale to members. Applications to be made to the Sec. Since this list was prepared The Caroline Sink Hole, Hells Hole, amended Weebubbie, New Cave Nll, amended Clara St. Dora, have come to hand. The Group also holds a number of maps eg. Flinders Chase, Buchan Range Valley, Gammon Ranges, Punyelroo Cave (100' = 1") Nullarbor Plains, Naracoorte Reserve, Oraparinna etc which may also be obtained TRIP REPORTS. MAY 27th CURRAMULKA. CORELL'S CAVE.

A party of 19 visited the cave, some members surveying completing a total of 6000 feet and others exploring which included several digs. One of these in particular seems promising but will take hard work to penetrate the compacted fill. JUNE 10th CAROLINE FOREST In conjunction with Members of the Victorian Sub Aqua And Speleo Society, surface surveys and underwater exploration were made in this area. The Caroline Sink Hole proved to be fairly shallow and there were no underwater leads. A large black mark on the air photos proved to be the true Hells Hole, this having been erroneously applied to the Caroline Sink Hole previously. The sink proved to be 150' diameter and 100' deep with 50' of water in the bottom, large enough to drop the Warbla Sinkhole into comfortably with a loud splash. Diving was not carried out here and will need special rafts, winches etc to successfully carry out operations. From here the combined Groups travelled across to the Mt. Schank Sinkhole areas. On the way, the spectacular volcanic cone of Mt Schank was climbed. Kongorong, a waterhole was dived to the depth of 140'. Later reports suggest this was the Town water supply, despite the presence of bovine skeletons in the bottom silt. It is whispered that the Diving Research

Group claimed a depth of 135' at Mt. Gambier during the same weekend. A days caving at Naracoorte completed the trip. TROGLAMP PINNACLE TYPE.... Two Trogs were at ease on the floor of a cave... A said to B, "how far does this unscrew" ...... WHOOSH ........
