INTRODUCTION

This is an index to the contents of *Southern Caver* published by the Southern Caving Society from Volume 1 number 1 to Volume 12 number 4 and then in the new series numbers 49 to 51 inclusive. These were published between July 1967 and December 1982, a period spanning 15 years.

The quarterly issue of the magazine ended with Volume 12 number 4 and it subsequently became an occasional publication commencing with number 49 (the magazines between Volume 1 and Volume 12 inclusive were counted as 48 issues).

The Southern Caving Society was formed in April 1965 with the aim of furthering the exploration of Tasmanian caves and promoting their study and conservation.

The *Southern Caver* is an invaluable record of 15 years of Tasmanian speleology and the diversity of contributions to the magazine reflect a wide range of interests including for example, cave fauna, exploration, diving in sea caves, snow cave geomorphology and underground photography. The list could go on.

Copies of some of the issues are still available. For information on availability and cost, write to the Secretary, Southern Caving Society, P.O. Box 121, Moonah, Tasmania 7009.

ARRANGEMENT OF THE INDEX

There are 5 Sections A to E. These are:

- A. Tasmanian Caving Areas. A Series by Kevin Kiernan.
- B. List of Cave Surveys (listed by karst area and caves).
- C. Articles by Author
- D. Articles by Subject
- E. Contents of Each Issue

Editorials are not indexed.
