

Muong Sai Proposed Nature Reserve

Alternative site name(s)

None

Province(s)

Thanh Hoa

Status

Proposed

Management board established

Unknown

Latitude

20°10' - 20°18'N

Longitude

104°56' - 105°08'E

Bio-unit

10b - Northern Indochina

Conservation status

There is very little information available about Muong Sai. The site is not listed on any government decision or official set of proposals regarding the Special-use Forests system (MARD 1997, FPD 1998). However, a proposal to establish a 10,000 ha nature reserve at Muong Sai was made in 1995, presumably by Thanh Hoa Provincial People's Committee (FPD 1998).

Topography and hydrology

The exact location of Muong Sai is unknown, and it is probable that the boundary has not yet been defined. Muong Sai commune is located in Quan Son district in western Thanh Hoa province, although it is possible that the proposed nature reserve also includes parts of Ba Thuoc and Lang Chanh districts. The topography of the proposed nature reserve is mountainous, and the site is located in the catchment of the Ma river.

Biodiversity value

Remote sensing data indicate that the vegetation at Muong Sai proposed nature reserve is a mixture of evergreen forest, bamboo and scrub.
