

Notes on PDF reprint of *Association for Mexican Cave Studies Newsletter*, volume 1:

Volume 1 of the newsletter was edited by Terry Raines and published monthly during 1965.

The PDF consists of scans of the pages, and hence consists entirely of graphic images. The text is not searchable by the PDF-reader program.

The copies of some of the issues available to me were poor in quality. Numbers 1 through 4 were poorly made reprints, with the text slightly truncated at the narrow right margin. If exact spelling of something like a cave or species name that was truncated is needed, it can be found in the index. Number 5 was a sometimes-faint spirit-duplicated original.

Because the cover pages and pages containing maps or photographs were not assigned page numbers, the original page numbers become increasingly different from the page numbers in the PDF file. The table below shows the PDF page on which each issue begins and the original number of the first numbered page, which follows the cover, in each issue. (Hence, for example, original page 82 is page 99 in the PDF file.)

The index, which was published separately, begins on PDF page 146.

issue number	PDF page of cover	first numbered page
1	1	1
2	14	12
3	27	22
4	42	34
5	56	44
6	65	52
7	74	60
8	84	69
9	98	82
10	113	95
11	121	102
12	133	109
