0407 473 539 Mobile, Email: (rossjay@iinet.net.au)  
Jay is a speleologist and an active outdoor leader. Member: ACKMA, and the two Speleological Groups in W.A. (that are corporate members of the ASF). Jay is interested in all aspects of caves and their management – with particular interests in karst management, cave conservation, cave rescue training and ecology. Jay holds several roles (with the ASF and WASG) including being the WASG Conservation Officer and one of the ASF Conservation Co-Convenors for W.A. She is the chair of the WA Speleology Conservation Committee, which co-ordinates and facilitates active discussion, participation and research by members into karst conservation issues and develops and implements cave conservation projects in WA. In January 2003, she was elected Senior Vice-President of ASF. Jay is involved in writing regular submissions on environmental assessment documents & management plans and letters to Government & land managers/proponents. It was Jay's participation in the A.S.F. vs Finesky (Cape Range Court case in the Mining Warden's court (1999-2002)) that led to her enrolment in postgraduate studies in Karst Management. Jay was granted the inaugural *ACKMA Life Member's Fund Award* (for 2003), for funded attendance at this Conference.

### **3. ANN ATKINSON, AM ☺**

P. O. Box 505, Ravenshoe, Queensland. 4872.  
Tel.: (07) 4097 6352 (office), (07) 4097 1402 (home), (07) 4097 6032 fax.  
Anne Atkinson graduated in Geology from Sydney University, and after marrying grazier Vernon Atkinson became a partner in the development of a new pastoral enterprise near Undara. In 1972 a short paper on the Undara Volcano was presented to an international conference, convened by the National Speleological Society of the USA at the request of NASA. This formed part of a major project to document the world's lava tubes. Colleagues from James Cook University formed part of the team and with Anne produced a series of papers on the McBride Volcanics and the Undara tubes. An army of volunteers collected survey data and produced the maps and long profile requested by NASA – a comprehensive documentation of the Undara Volcano and its associated tubes. Anne then carried out her MSc research on the basalts of the Atherton deep lead – a very complicated task. The work of Vernon and Anne Atkinson at Undara was recognised by the Explorers Club of New York in 1991. Vernon was elected a Member and Anne the first woman Fellow. She subsequently acted as a Consultant on the Undara lava tubes for the Queensland Parks & Wildlife Service, and was awarded a Member of the Order of Australia for her achievements in speleology and geology. She continues to be active in the conservation of these unique features of Australia's heritage.
