Sources:

It is not practical to isolate the sources used to compile this catalogue. It is primarily based on the catalogue published by Hamilton-Smith and Middleton (1971). Other sources are a library list published by SSS in 1968 (Ellis 1968), the current STC library accession list and the ASF library accession list (with thanks to Cathy Brown and John Dunkley)

ELLIS, Ross 1968 Australian speleological society publications in library. [Sydney Speleological Society] *Year Book* 1967-68, pp. 17-23

HAMILTON-SMITH, E. & MIDDLETON, G. 1971 Speleological publication in Australia. *ASF Newsletter*, 54: 4-11

* An asterisk indicates the publisher became defunct after 1971 or the group amalgamated with another.

² From 1971 incorporated in *Journal of SSS*.

As indicated in Hamilton-Smith & Middleton (1971), there is a degree of subjectivity in assigning publications to a category. The decisions have been the author's – largely in accordance with the previous classifications. Serials are only listed in the 'defunct' group if they have become defunct since the 1971 version of the catalogue was published. Those defunct prior to 1971 are shown in the main table, but not in the summary, unless they were revived after 1971, as is the case with *Cave*, *Descent*, *The Western Caver* and *Troglodyte*.
