1.0 Contents

This file provides a systematic verbal map of the catalogue. Generally, each geographic area is contained within a specific folder. However, Jenolan demanded a number of folders, and some small areas may be brought together with related areas in a single folder.

Then within any folder, each series of cards is also given a series number; and within each series, each card has a card number. Thus, we have a simple three-level hierarchy within which specific cards may be located.

File Names	Series numbers and notes
