

FLINDERS UNIVERSITY SPELEOLOGICAL SOCIETY INCORPORATED

Sept. 2014.

Flinders Uni Speleological Society Inc, (FUSSI), founded in 1974, started to produce Newsletters and distribute them to all ASF clubs in mid 1989. Up until then the club kept a log book of its activities.

The editors varied, from which ever caver crawled out of a hole to those appointed.

Predominately they were:

Paul and Deborah Waclawik

Jonathan Walsh

Kevin Cocks

but mostly Clare Buswell with Heiko Maurer as Proof Reader.

In this CD, there are 26.5 years of Newsletters. Below is a list of those published each year. Some years' four issues were published in others only two. Also included is the first FUSSI handbook produced in 1974 and the second one produced in early 1990 with occasional additions.

The files are PDF files. This archive was produced over February 2013 - Sept 2014. It contains some personal details which were far too time consuming to remove. Therefore we ask that NONE of this material is placed on the World Wide Web.

Flinders University Speleological Society Inc holds full copyright to the material on this CD

Enjoy 26 years of FUSSIng around the place.

Clare Buswell.
